

CRAFTtap

The ultimate chilled post mix dispensing tap

Multiplex® CRAFTtap

the ultimate experience in serving chilled

Create a premium, chilled drinks experience with the revolutionary Multiplex® CRAFTtap. A post mix valve with a streamlined design to showcase a soft drinks offering, to meet the growing demand for refreshing, non-alcoholic drinks.

This unique, singular tap allows flexibility for a high-end dispensing valve to be mounted onto any tower or make a statement by displaying a series of taps on a customised tower or wall.

Made from 100% stainless steel, it offers a durable solution that is hygienically designed to ensure it is easily kept clean whether used by staff or for self-service.

Drinks are served at a consistent cold temperature every time, through cleverly integrated chilled body technology that cools via an internal recirculation loop, keeping the tap body extra cold.

The actual tap remains visibly cold too!

Designed for carbonated soft drinks the precision engineering nozzle with a flow range from 1.5 to 3.5 oz/sec and the smooth action handle ensures superior in-cup carbonation and reduces excessive carbonated soft drink foaming.

Compared to the more traditional plastic dispense gun, CRAFTtap is a stylish solution that elevates the soft drinks offering from under the bar and *provides new merchandising opportunities at point of sale,* either through signage or customised handles.

The Multiplex® CRAFTtap will give a classic, elegant look to any new installation and upgrade an existing one. With an integrated push to connect fitting, it is quick and easy to install into existing bar frontages, eliminating the need to change any major fabrication.

In addition, for a *high-quality premix dispense solution,* choose

Multiplex® ROTotap

Multiplex® ROTotap is a high-quality premix dispense solution providing a unique precision engineered innovative valve. The range consists of ultra hygienic, simple to use taps with reduced number of components. Cost effective, hygienic, reliable, stylish dispense solutions.
