

Keykeg to Sankey Cleaning Socket Adapter

Operation Instructions

Step 1.

Ensure the internal seal and external seals are in position.

Note that the small external seal should have the ridge facing down.

Step 2.

Before attaching the coupler to the adapter check that the handle is fully up.

Then attach the adapter to the coupler by inserting and turning the adaptor until it stops thereby ensuring it is securely anchored.

Step 3.

Insert the assembled coupler and adapter into the cleaning socket and twist until firmly located. Ensure the handle of the coupler is up and NOT in the engaged position (handle down).

Step 4.

Push the handle of the coupler down until it clicks. The coupler is now securely engaged and ready to commence line cleaning.
